This is a 2 part assignment-
It will be due next week in your small group section. It will be worth 10 points.

Part One. (Worth 5 points)
Use one of the two books for this course that deal with labor history. Provide a full citation for that book: author or editor (last name first, then first name); title; edition, if indicated; place of publication; publisher; and date of publication.

a. Select a phrase from page 100 of the book. Write a sentence in which you quote from the book, using that phrase, and add a footnote number to the end of the sentence. Then create a footnote/endnote for the sentence that includes author’s name; title; place of publication; publisher; date of publication; and page number. Attach a photocopy of page 100.

b. Select an idea from page 130 of the same book. Paraphrase that idea in a sentence (that is, put the idea in your own words) and add a footnote number to the end of the sentence. Then create a footnote/endnote citation for the sentence. Attach a photocopy of page 130.

Part Two (each question is worth 1 point)
Answer each question fully in no more than 2 sentences. Explain your answer & tell me WHY you came up with that answer.

1. Edna is writing a term paper for her class. She asks Bill to proofread the paper for her. Is Edna academically dishonest?

2. Herman takes notes on many different books while writing his term paper, but does not note the sources as he is taking the notes. When he is writing the paper he draws on some of his notes, but forgets what is his own thought and what is borrowed; unintentionally he quotes some other sources without attribution and his instructor notices this. Will the fact that his action is unintentional make this offense less serious?

3. Dr. Urbanmeyer gives students a list of questions and tells them that some of the questions will be on the final examinations. Several students study together and help each other formulate answers to the questions. Are they being academically dishonest?

4. Tebow is given a class project to interview ten people to survey their feelings about a particular topic. After getting the same response from the first five people, he reports that all ten people gave the same response. Is this academically dishonest?

5. On the first day of classes you are happy to discover the assigned essay is on a topic you wrote a paper on last term. You print off a new copy and hand it in on the due date with a new cover page. Is this considered dishonest?
