Blistering days. Freezing nights. A landscape that in some places resembles the surface of the moon.

It takes a special type of person to live in the Arizona desert. And we’re proud to say that some of these special types are working at Toyota’s multi-million-dollar Arizona Technical Center and Proving Ground.

Here, teams of local scientists, engineers and drivers put Toyota vehicles through the kind of torture most of us will never experience in a lifetime of driving.

Arizona is just one part of Toyota’s global family of operations. A network that encompasses technical centers and design studios on three continents. And manufacturing facilities in 26 countries from Australia, to Venezuela, to the UK.

As a company doing business in the global marketplace, Toyota recognizes the need to invest locally, to ensure that the products we sell answer the special needs and standards of all of our customers.

In the U.S., there are Toyotas designed in California, tested in Michigan and built in Kentucky, California, and soon in Indiana.

Around the world, Toyota is committed to investing in local people. And, even out in the desert, it’s proving to be a fertile investment.
