List at least three things you learned from the presentation?
1. 

2. 

3. 

What one piece of information from the presentation do you think you will remember and how likely is it that you will remember it in five years?

Are there things that you can do to help “solve” the problem (or issue)? If so, what are they? How likely is it that you will actually do anything to help create change?

Any other comments?
